GRATA BIG SNAKE Hors - A Visit to His Den Obse ya. the largest sized wash tub, with its head projecting from the center. Casting my tions and Measurement-Full De-eyes upward to a small rock about three scription of the Reptile. eyes upward to a small rock about three feet above the larger snake, I saw

During the past year a very large snake has been seen frequently on the farm of Mrs. Joanna Kirk, in this township, about two miles from Barnesville. to two such mammoths of the serpent Mr. James Woodland, who is farming the lands on which this serpent dwells and sports, has had several adventures with it. Once in corn planting he was pursued by it, and was compelled for a few days to abandon his occupation for fear of its attacks. At another time he was cutfing his oats, when he heard a was cutting his oats, when he heard a rustling sound just before him in the standing grain. On looking up and ahead he saw the oats were pressed out to the right and left from a common

center, and bending toward him, form-

and three feet wide. Presently the head of the snake came asked by hundreds of our people, resin view nearly on a level with the top of dents of this immediate vicinity, and the oats, and moving directly toward elsewhere, such questions as the followhim. He also had a glimpse of the snake's body, partly elevated against the yielding stocks and partly zigzagging on the ground; and be is of the opinion that the length of the body could not be less than thirty feet, and fully ten inches across. It is certain that Mr. Woodland dropped his cradle and "cut dirt," closely followed by the snake, until he was out of the field. The monster then quietly coiled himself the prospects are better. The reason The monster then quietly coiled himself the prospects are better. The reason about the shade of an elder bush to enof the vanquished trespasser on the sanctity of its home. And so it remained until the long shadow of coming night warned it to depart for its rocky caste.

In respective time a little colored boy.

In raspberry time, a little colored boy, son of Albert Mabra, was in search of this fruit. Not thinking of the snake he commenced to cross the oats field of Mr. Woodland. When about two-third's to which I answer, if worked properly, Mr. Woodland. When about two-thirds to which I answer, if worked properly, through the field he happened to look back and saw, projecting fully five feet above the oats heads, what looked like a black pole, and moving right at him. All the stories of the sunke flashed on his mind, and away fled the boy through the oats, with the snake close at his hooks. The how so hadly scared out. heels. The boy, so badly scared, out-ran the snale and escaped out of the will require much labor and considerable

field, when it gave up the pursuit.

Nobody, however, had thoroughly investigated the subject until last Saturday, when we dispatched a reporter depend altogether upon the rains to supto the scene. He succeeded in learning ply water for mining purposes, at least all about the snake, and relates his ad- for the present; or until such times as

ventures as follows:

On last Saturday, after the storm, and in ditches, from the source of some when the sun broke through the clouds never-failing stream. warm and shining, I determined to pay a visit to the habitat of the snake, to from twenty to twenty-two carats fine. see if I could get a sight of it. I knew Where this gold came from, or what that after a thunder storm, if the sun agent has been used to bring it to this shone hot and bright, that the larger place, is hard to tell. We may safely snakes invariably come out to sun themselves. So, armed with a revolver and a large hickory club, I started down the railroad and crossed over to the summit I find, however, many signs of icebergs of the hill, just above Mr. Cox's resi- having passed over our hills. I have dence. Walking along the line fence between Mrs. Kirk's and Mrs. Jones' native lime-stone, grooves cut across the farms, which seems to be the pivotal surface; also similar grooves upon feldpoint about which the perambula-tions of the snake are performed, I pro-ceeded west until I came to Mr. Wood-tains of ice, which have many cer land's tobacco field. Here I observed twies since passed over our land. In all two pannels of the fence crushed down to about three rails high, and across the broken fence lay what I took to be a bout which of late there has been so black log, about the size of an ordinary much excitement, the excitement will

I went on a few paces further, when the sun flashed out and the whole length of the supposed log that was in sight, shone brightly in its warm rays. I as to enrich our country and assist in halted, when not over twenty feet from the black object, and stood still. I was bonds, and connect Batavia with Milford satisfied it was the thing sought for. I by railroad.
grasped my club with a firmer hold and And now to all whom it may conremained motionless, for perhaps five cern, I have given my candid opinion minutes, when the head of the snake (as far as my investigations have gone) shot up above the top of the tobacco in regard to the gold mines of Clermont plants only three rows from me. The county. head was about a foot long and six inches wide, and of a dark-brownish color. The eyes were large or appeared to be, and as black as charcoal. They were surrounded by a white ring as large as mittee announce the following township ous glare to the side of the head.

So I determined to remain still and note at the control of the c take me to be a stump. So I determined Spangler's School House, Saturday evening, September 26th. Speakers—George L. Converse, J. St. ly the head of the serpent began to rotate first to the west and then toward ers -George L Converse and C. Loewenstein. me, but as his snakeship kept his mouth shut, I felt sure that he did not recognized me as a man. In a little time the head bent forward and commenced to head bent forward and commenced to snakeship kept his mouth the shelm and the shelm an move along the tobacco row at right angles, with the fence. When the head had got perhaps fifty yards distant, I looked for the black log across the fence, but it was gone. By this time the head was at least a bundred yards from me, and I at least a hundred yards from me, and I Dubin, Saturday, October 3d, at 2 P. M. Speak-resolved to make an effort to see the enresolved to make an effort to see the enresolved to make an effort to see the enresolved to make an effort to see the entire body if possible. I made a circuit through a corn field adjoining the tobacco field, and came out close to a large stump in sight of the snake's head, a little south of me. On my way I had ments for these meetings. Let everybody

found a couple of clapboards.

I went on the opposite side of the the campaign discussed. stump from the snake, placed one of the clapboards on the ground, and gave it a half dozen strokes with the other. At W.S. HUFFMAN, Sec'y. the unusual noise the snake thrust its head and body up fully six feet above DEMOCRATIC BASKET MEETthe tobacco, shot out its tongue with a clucking, hissing sound, and then darted The Democratic Executive Committee away obliquely toward the fence. As the serpent had retreated in such haste, I grew bold and dashed down through the tobacco, and when I came in sight of the fence the snake had just reached it. It poised its head on the seventh rail and slowly glided over the fence. The time consumed in passing across the feuce enabled me to judge very accurately of the size of the reptile. The full length of the body, at the lowest estimate, was thirty feet, and its average diameter six inches. The track made by it in the soft tobacco grounds, was at the standard of the size of the reptile. The full length of the body, at the lowest estimate, was thirty feet, and its average diameter six inches. The track made by it in the soft tobacco grounds, was at away obliquely toward the fence. As announce the following Basket meetings: by it in the soft tobacco grounds, was at by it in the soft tobacco grounds, was at some points two inches deep, and the radius of deviation from a direct line, made by the bendings of the track, was slightly over two feet, where its motions meetings the largest ever held in the counwere unobstructed.
